KUBO SMART GROWING

EXPERT SUPPORT FOR HIGH PERFORMANCE GREENHOUSES

KUBO
FOR A GROWING WORLD

WHAT IS SMART GROWING

Smart Growing is KUBO's support program for customers who want to get the most out of their greenhouse investment. It combines: Training and knowledge - Transfer - Operational improvement - Remote and on-site support - Crop and climate consultancy - Tailor-made advice.

WHY IT MATTERS

High-tech greenhouses offer great opportunities, but success depends on the right knowledge and approach. KUBO Smart Growing helps customers build a strong foundation for efficient, reliable and profitable greenhouse operation.

SERVICES	FOCUS
Online Ultra-Clima® startup training	System knowledge, plant physiology and climate computer settings.
Remote support	Climate data, growing strategy and system optimization.
Remote & on-site Crop consultancy	Climate, irrigation, nutrition, energy and labour.
KUBO Blueprint	Process improvement and quality management.
KUBO autopilot for Ultra-Clima®	Stable climate control and optimized greenhouse performance.
Practical on-site training	Hands-on training in daily greenhouse routines.
Training at KUBO	Role-specific training for growers, operators and technicians.

KUBO
FOR A GROWING WORLD

OUR APPROACH

Modern greenhouses are becoming increasingly advanced. To achieve the best results, growers need more than technology alone – they need the right knowledge, skills and support.

THE RESULT

KUBO Smart Growing helps customers before, during and after greenhouse realization. Through practical guidance, training and expert advice, customers can optimize greenhouse performance and strengthen daily operations.

- ✓ STRONGER KNOWLEDGE
- ✓ MORE CONFIDENT TEAMS
- ✓ BETTER GREENHOUSE PERFORMANCE

SUPPORT BEFORE, DURING AND AFTER REALIZATION

Before construction
Advice on greenhouse concept, climate strategy and resource use.

Start-up
Training on systems, climate principles and greenhouse operation.

Operation
Crop consultancy, remote support and process optimization.

✓ Smart Growing supports customers in every phase of the project.
Support can be tailored to the customer's goals, team and greenhouse operation.

KUBO
FOR A GROWING WORLD

A STRONGER START-UP

Training.
Helps the customer's team understand the greenhouse system, climate principles and climate computer settings from the start.

More stable climate control.
Expert guidance supports a stable greenhouse climate through data-based advice and practical recommendations.

Healthier crop development.
Crop specialists advise on cultivation, irrigation, plant nutrition, energy use and crop strategy. Better trained local teams Online, on-site or KUBO-based training helps growers,operators, technicians and managers build practical knowledge.

More efficient operations.
Smart Growing supports better processes, stronger quality management and more efficient daily greenhouse operation.

WHAT GROWERS GAIN

- Smart Growing helps customers build knowledge.
- Improve performance.
- Create a stronger operational foundation.
- Supports a smoother start-up.
- More confident teams.
- More efficient greenhouse management.

BUILT FOR LONG-TERM GROWING SUCCESS

From early advice and start-up training to crop consultancy and operational improvement, KUBO Smart Growing helps customers get more value from their greenhouse operation.
